

Job#: 6270

Date Posted: December 14/2017

Location: Montreal, QB

Position: Senior Consultant – Microsoft Business Intelligence

POSITION SUMMARY:

The MS-BI senior consultant is responsible for designing and delivering performant BI applications to our clients by leading a team of consultants in collaboration with the project manager. This posting is for experienced Microsoft architect who are passionate in new technologies and in performance management while always being client facing.

KEY ACCOUNTABILITIES:

- Lead any proof on concepts using appropriate Microsoft BI technology
- Lead in analysis, design, development and testing phases
- Document business processes, business requirements and system requirements
- Provide specifications for ETL or any service oriented dataflow
- Establish and implement Microsoft BI cloud strategy
- Lead database design for the following solutions: Data Warehouse, Data Vault, Data Lake, MDM and Big Data
- Support Integrated and UAT testing
- Steer performance tuning
- Act as on site lead for the Canadian Delivery Center
- Support the project manager and the scrum master
- Define good development practices and methodology for the team
- Guide developers throughout the development phases
- Deploy solutions in regards to our client's DevOps approach
- Participate in project proposals and RFI
- Participate in business development activities

QUALIFICATIONS / SKILLS REQUIRED:

- A minimum of 10 years of relevant experience
- Bachelor's Degree
- Strong working experience in an environment with Microsoft BI (SSIS, SSAS, SSRS, Power BI)

- At least 3 years of experience delivering various projects involving Microsoft Azure technologies
- Experience in Agile Methodology
- Proven design and development experience as a Microsoft BI Architect or senior Consultant in complex environments
- Working experience in debugging BI bugs as they relate to queries, reports, cubes or dashboards
- Experience in developing using version control tools such as TFS
- Knowledge of MS Project, any Agile platforms and Visio
- Good communication skills, both written and oral in English and in French
- Demonstrate experience in performing gap analysis and impact analysis
- Experience supporting business users working on projects or programs involving multiple highly inter-dependent applications and/or data sources
- Demonstrated capacity to work collaboratively with client organizations
- Ability to work with and lead diverse remote teams
- Experience in change management
